

**Integration with smart building management systems...**

## SPRVSR+ Plug-In Integration with HikCentral

Hikvision and Mavili Elektronik's R&D teams collaborated together and integrated Maxlogic & Mavigard brand fire alarm system to Hikcentral software.

With the Sprvsr+ Plug-in, which was added to the HikCentral program, allows different systems to be controlled from a single center, it has been facilitated to ensure safety of life and property against fire.

- ▶ In the Sprvsr+ Plug-In software, configuration options such as adding maps, addressable system devices and application settings are performed with the Sprvsr+ software.
- ▶ With Mavili Fire Center, Maxlogic & Mavigard brand fire detection devices in the building can be displayed graphically on the floor plan.
- ▶ Adding IP cameras, device camera mapping can be done easily from HikCentral's "WebClient" interface.
- ▶ HikCentral IP cameras can be matched with the devices in the addressable system configuration..
- ▶ Sprvsr+ Plug-In software sends information to the HikCentral software when a fire alarm is detected, enabling live view from the relevant IP cameras.
- ▶ The licensing of Sprvsr+ Plug-in software is done by dongle. A dongle must be obtained to run the software.

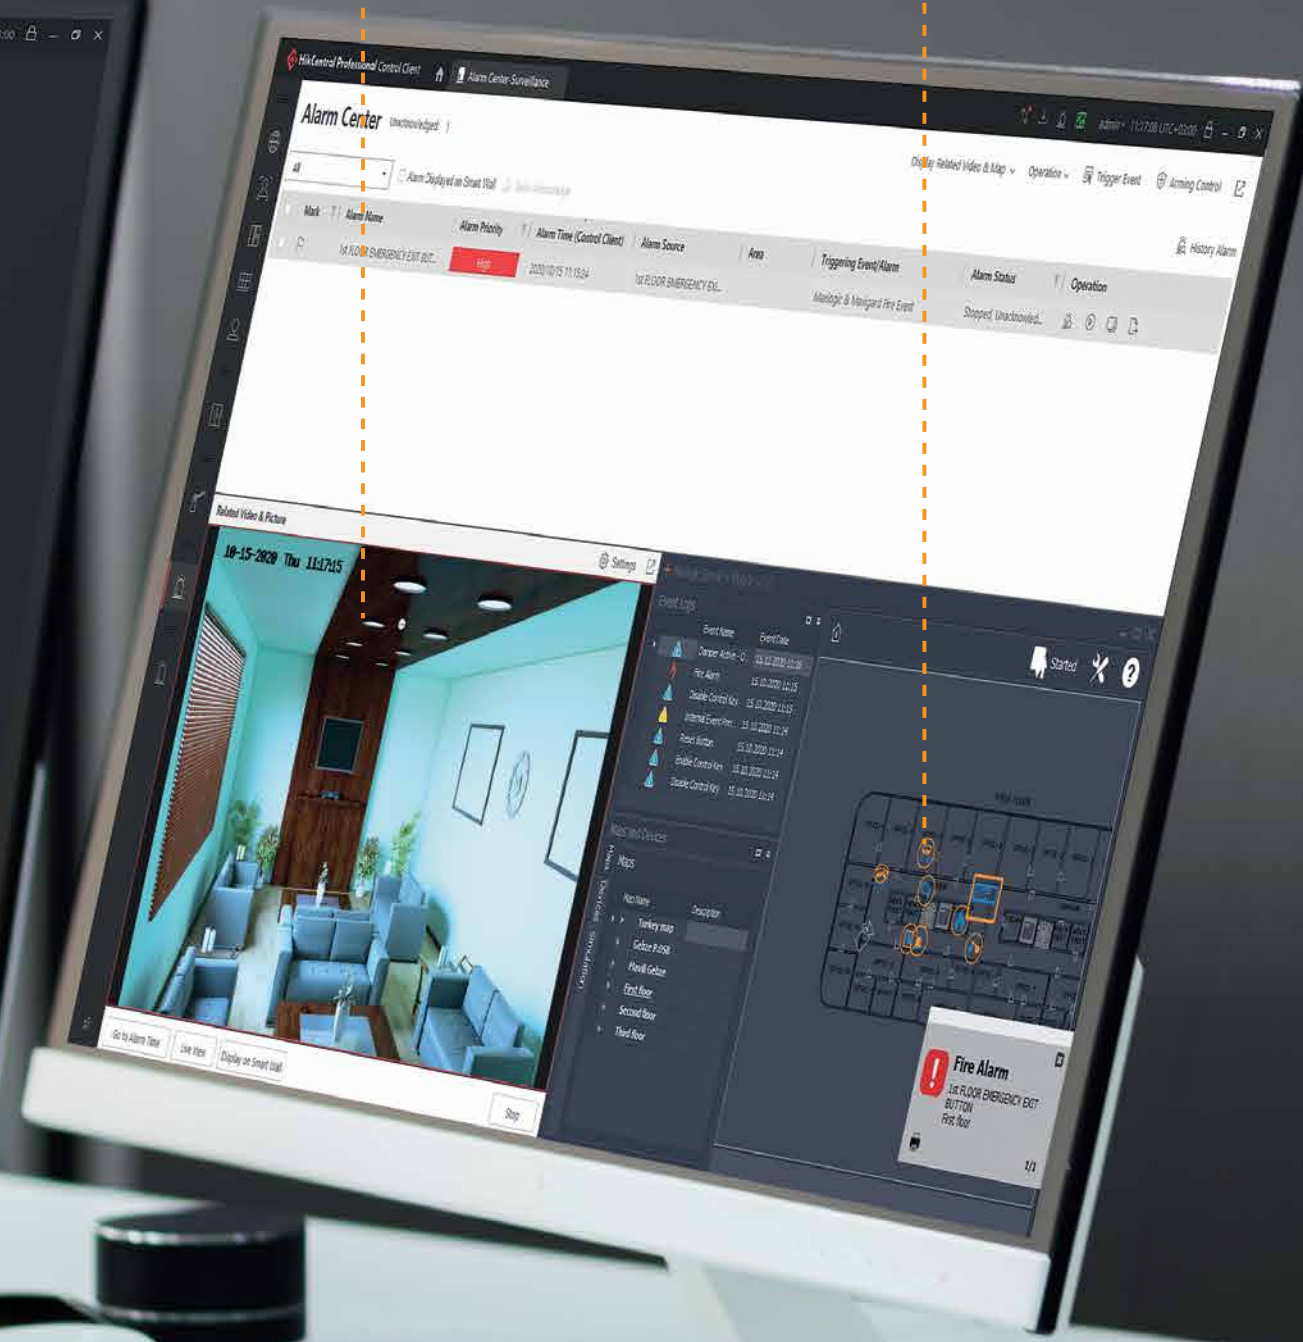

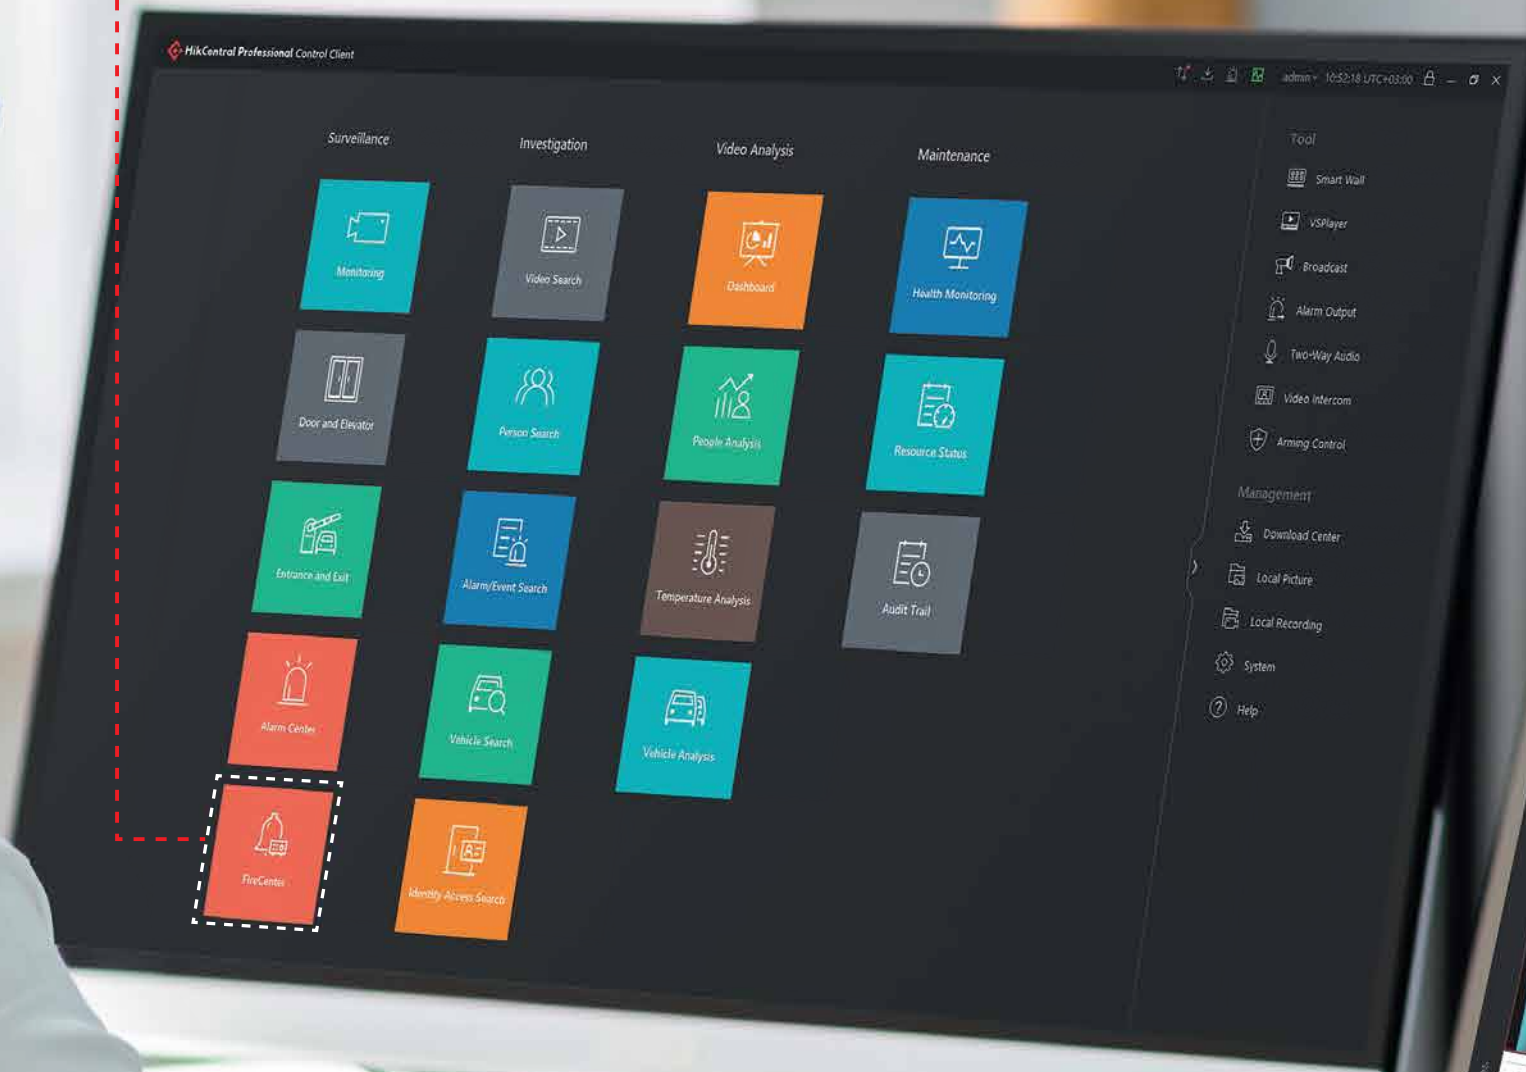

maxlogic & mavigard  
fire and gas detection systems

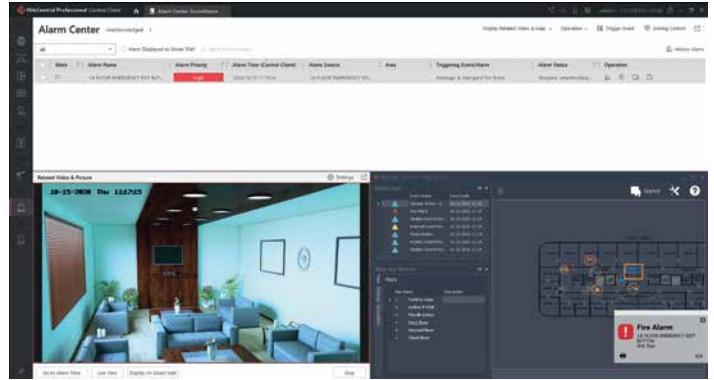

It can easily manage Maxlogic & Mavigard brand fire detection systems with the **"Fire Center"** button on Hikcentral software.

In case of fire alarm, users can both examine the camera images from the **CCTV** system and determine the location of the alarm on the map.

In addition, the operator can **remotely control** the fire alarm system.

Live images can be taken from **IP cameras** with matched detectors.

When the system is started, fire events coming from the addressable system are transmitted from Sprvsr+ Plug-In to HikCentral. The transmitted alarm is displayed in the HikCentral **"Alarm Center"** window.

Nowadays, where smart building technology is widely used, roof software, which offers the opportunity to manage different systems from a single center, is increasing importantly. In case of fire, it is vital to learn, monitor and respond to the event immediately.

## SOFTWARE MODELS

Product Code	Description
ML-1634.1	Maxlogic SPRVSR+ Graphic Monitoring and Control Android Software using cost, 1 user
ML-1634.5	Maxlogic SPRVSR+ Graphic Monitoring and Control Android Software using cost, 5 user
ML-1634.10	Maxlogic SPRVSR+ Graphic Monitoring and Control Android Software using cost, 10 user
ML-1635.1	Maxlogic SPRVSR+ Graphic Monitoring and Control IOS Software using cost, 1 user
ML-1635.5	Maxlogic SPRVSR+ Graphic Monitoring and Control IOS Software using cost, 5 user
ML-1635.10	Maxlogic SPRVSR+ Graphic Monitoring and Control IOS Software using cost, 10 user
ML-1636.1	Maxlogic SPRVSR+ Plug-In Graphical Monitoring Software Using cost, HikCentral Integration

## DONGLE MODELS

Product Code	Description
ML-1661.1	Maxlogic SPRVSR+ Master USB Dongle using cost
ML-1661.2	Maxlogic SPRVSR+ Slave USB Dongle using cost
ML-1661.3.1	Maxlogic SPRVSR+ Plug-In USB Dongle using cost, HikCentral Authorization
